

Your Connected Care Home

We understand that, as a care provider, your focus is on delivering great care and sometimes time-consuming, paper-based admin tasks can seem to get in the way of this. Our flexible software solution for care home management can help you organise your care home, save valuable time and money, and ensure you're always focused on providing care

The ideal solution

A care home management solution with mobile capabilities that can be rolled out across multiple sites within your organisation to promote data sharing. The solution would enable creation of personalised care plans and keep track of staff skillsets. Staff would be able to prove to compliance inspectors that they are meeting requirements and achieving results. The ideal solution would also be failsafe in terms of data protection, and services could be managed and hosted offsite initially, so that staff can spend more time caring for service users. The solution would need to be customisable and flexible, so it can grow and adapt with the business.

Complete care home management

> With our care home management solution, you can reduce wage costs by 2% by automatically generating timesheets, accurately recording clocking in and out times and optimising your schedule for increased staff productivity.

> Our solution will also ensure you stay on top of your income and billing needs for your current residents, as well as keeping track of enquiries, referrals and external marketing.

A paper-light care home

> Our solution provides you with automatic support plans, consistent quality of care assessment for residents and customisable care templates, to help calculate risk and dependency levels in your service users.

> Our Caresys solution also reduces the amount of paper records and paperwork whilst improving the quality of documented care plans. Staff can update care records on mobile devices, reducing the need to update paperwork at the end of a shift.

Your Connected Care Home

Stay on top of CQC regulations and audits

- > Our care home management solution can help you streamline your services, by making care records fully accessible and mobile, enabling you to produce a full audit trail.
- > Show you're focused on person-centred care with our mobile solution, staff can update service user details and care records at the point of care, meaning more accurate details are likely to be recorded. Time that would normally be spent carrying out admin tasks is saved, meaning staff get to spend more time with residents during their shift.

Failsafe data security

- > The servers we operate are held in Tier 3 aligned centres, this is the highest level of security possible, we already host secure patient data for clients in the NHS.
- > We offer a disaster recovery service for all data stored in our servers, if the worst happens, you and your staff will be back on your feet providing care to your service users in no time.
- > In the event of data loss or system failure, we employ on-site technicians in our data centres to fix problems quickly and responsively, ensuring you can get back to providing patient care as quickly as possible.

A mobile solution

- > With a mobile care home management solution, you can view management information on your mobile device anytime, anywhere, helping you to stay on top of care delivery.
- > Our easy-to-use mobile application promotes data sharing across your care home, meaning staff instantly have all the details they need to hand when delivering care to a resident. This comprehensive view of care provision allows for a more detailed service user record, helping you to promote person-centred care.

More from Advanced

We are the third largest software provider in the UK. We support over 3,000 care homes and believe that our comprehensive, easy-to-use care home management solution is the best way to ensure their residents are receiving the care and support they deserve.
