Staffplan
Homecare Rostering Software Solution

We support over 1,000 homecare providers in the UK with increasing their operational efficiency, care delivery and compliance with our single rostering software solution.

Our solution brings together staff rostering and mobile working to provide real time updates between your office staff and care workers. We understand the importance of running an efficient organisation, so we have integrated all functions of a modern care service from recruitment and referrals, scheduling, training, timesheets, invoicing, payroll, expenses, management reporting and more, into one solution.

Our solution is made up of the following suite of products:

> Roster

> iConnect

> Monitor

> Care Portals

> Data Gateway

Roster

We understand the importance of managing your day to day operations, including delivering an efficient service and supporting your back office operations, our solution has been developed to support you with these. Our solution works on a centralised management system, making it easy to inform your care workers of changes made to their diaries. With us, you can easily manage invoices and payments based on the planned or actual visits.

Our solution also offers you full data security giving you the flexibility to meet the evolving demands of your care market.

iConnect

We have developed our mobile working solution to provide you with real time communication between your office staff and care workers. Our solution removes the needs for paper rosters and timesheets, and provides evidence of arrival and departure times, improving the efficiency of your organisation.

The advantages include:

> Easy to use system

> Real time information

> Improved data security through the reduction of paper based information

"Staffplan Roster is fundamental to our business approach now and we simply cannot operate anymore without it."

A1 Nursing & Homecare

Homecare Rostering Software Solution

Monitor

We know it's important to know where your staff are and with our low cost electronic monitoring solution, we can support you with recording the arrival and departure times of your workers.

The advantages include:

> Full integration with Staffplan Roster

> Real time monitoring

> Alerts for missed and late visits

Care Portals

We have developed a solution to meet the needs of a mobile workforce and increasingly Internet savvy service users. Our solution provides you with immediate access to relevant care information for users, family members and care workers.

The advantages include:

> Easy access to view scheduled care visits with information about the care worker visiting and the tasks to be completed

> View detailed rosters, showing where your workers are due to visit and tasks to complete

> Greater communication and transparency between care workers, service users and their families

Data Gateway

We provide you with a simple way to gain access to the data held within Staffplan Roster. We know you are unique in how you run your service, so we have developed our solution so you can design, build and run reports using the tools of your choice, providing a quicker, more cost effective alternative to chargeable consultation.

The advantages include:

> Quick access, self-service reporting

> Greater control and reduced costs

> Increased access to your data helping you to make key business decisions and evidence care delivery

Benefits

One solution: Streamline your processes and information into one complete solution.

Detailed records: Provided in a comprehensive single database of information.

Sharing information: In real-time across the organisation.

Invoicing and payment management: Easily managed based on planned or actual visits.

Roster optimisation tool: Proven to reduce costs whilst maintaining quality of care.
